

**IMPROVED SUBTERRANEAN TREATMENT FLUIDS AND METHODS OF
TREATING SUBTERRANEAN FORMATIONS**

ABSTRACT

[0001] The present invention relates to bridging agents for use in subterranean formations, to well drill-in and servicing fluids comprising such bridging agents, and to methods of using such bridging agents and well drill-in and servicing fluids in subterranean drilling operations. An example of a well drill-in and servicing fluid of the present invention comprises a viscosified fluid, a fluid loss control additive, and a bridging agent comprising a degradable material.
